

Unassessed exercises / problems:

1) The following questions concern primary and secondary research:

- a) State 3 advantages of primary research over secondary research
 - b) State 3 advantages of secondary research over primary research
-

2) Identify which of these citations you think are *correct*, *incorrect*, or "*correct but not really desirable*". Give an explanation for each of your decisions.

- a) Well informed business decisions makers fail to predict the judgements of less-informed decision makers [2].
 - b) Neresessian [16] drew novel insights about reasoning...
 - c) Neresessian drew novel insights about reasoning [16]...
 - d) [16] drew novel insights about reasoning...
 - e) For example, Gallotti et al. (2016) have applied..
 - f) For example, other research has applied (Gallotti et al, 2016)...
 - g) Focus+Context [1] is a powerful technique...
 - h) As in [4], we take the approach...
 - i) As in the work of Starr [4], we take the approach..
-

3) Write a level 3 summary of any 1 of the following papers:

- <https://dl.acm.org/doi/abs/10.1145/3290605.3300310>
 - <https://dl.acm.org/doi/abs/10.1145/3313831.3376702>
 - <https://dl.acm.org/doi/abs/10.1145/3242671.3242684>
 - <https://dl.acm.org/doi/abs/10.1145/3173574.3173673>
 - <https://ieeexplore.ieee.org/abstract/document/9583820>
-

4) This question is designed for you to investigate and learn more about the “peer review” process.

The ACM CHI Conference on Human Factors in Computing Systems is a premier venue / conference in HCI. Your task is to find out more about its full paper peer review process.

Write a few paragraphs discussing this – if you feel inclined compare your information with a friend/colleague.

Some concepts you might want to cover include:

- What is the general process (from paper submission to publication)
- How papers are review
- Reviewer blindness
- Ethics
- Who are “external reviewers”
- Who are “ACs”
- Who is a “peer”
- What is “the PC meeting”

You do not need to address all of these.

If you intend to compare your answer with a friend/colleague you might decide to split the bullet points with each other (e.g. person A decides to answer the first 4, person B decides to answer the bottom 4)
